**7.92x57mm , 8mm Mauser, or 8x57mm Mauser**

---

The **8mm Mauser**, came into existence in 1905 when the 7.92x57J was upgraded with a 154 grain spitzer bullet with a diameter of .323. This was the primary military round for Germany during WWI and WWII.

**Ballistics** - Very similar to 30.06.

**New Production Ammo** can be found manufactured by [Norma](#), [Sellier Bellot](#) , [Winchester](#), and [Remington](#) to name a few.

**Surplus Ammo** - Found all over the place. Almost all corrosive. Make sure you follow corrosive ammo cleaning guidelines or you will corrode you rifle bore. Brass is pretty much unloadable.

**Reloading Dies** are made by [Dillon Precision](#), [RCBS](#), [Redding](#), and [Lee Precision](#) , to name a few.

**Reloading components** can be found at [Huntington's](#), [Midway USA](#), and the [Wholesale Hunter](#), to name a few.

**Brass** - I suggest purchasing new brass from Midway USA or other supplier listed above. Widely available and inexpensive.

**Powder** - IMR 3031 or IMR 4064 are both good powders for this

round.

Specification	8x57mm Mauser
Bullet Diameter	.323
Neck Diameter	.353
Shoulder Diameter	.443
Base Diameter	.469
Rim Thickness	
Case Length	2.11
Cartridge Length	2.24
Velocity	2880
