Review is opinion of Surplusrifle.com

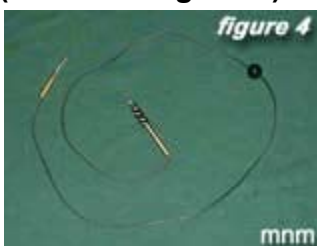

I recently tried out some cleaning kits from **J. Dewey Manufacturing**. They are known for their excellent one piece cleaning rods. I have a couple in my garage and some of you probably do also.

The first product is a **Pistol/Rifle Cleaning Field Kit (shown in figure 2)**. This is really handy and comes in **one very small** container that can be easily clipped to a hunting vest or stuffed in an already too full range bag.

When you pull everything out you may find yourself wondering if this little plastic bottle is like one of those clown cars at the circus, where an endless line of clowns keep coming out, because there is a lot of stuff packed in there **(shown in figure 3)!**

I really like the 30" pull-through cleaning cord with threaded standard 8/32 female ends. This way you can either take the brush and patch loop you get with the kit or augment the kit with your own

attachments (**shown in figure 4**).

The kit I reviewed was the Rifle-Pistol that cleans .22-.30 caliber firearms, they also make a Shotgun Model Kit.

Both Field Kits are \$15.95.

The next J. Dewey product is really a great starter kit if you have just purchased that first surplus rifle and need cleaning supplies. Or if you need to buy another cleaning rod, then this kit is something to consider.

Basically for the price of a good cleaning rod you can get **a cleaning rod and all of the accessories, all in all** - a pretty good deal.

Besides coming with a one piece, 24 inch, brass cleaning rod with a muzzle guard to

protect rifling, you also get a brass bore brush, brass patch loop, bottle of Shooters Choice FP-10 solvent/oil, patches, mil-spec -nylon - cleaning brush, and a silicone - wiping cloth.

This kit is available in many calibers -

- .22 Cal. Pistol Kit
- 9mm/.38 Cal. Pistol Kit
- .40 Cal. Pistol Kit
- .44/.45 Cal. Pistol Kit
- .22 Cal. Rifle Kit
- .30 Cal. Rifle Kit

All J. Dewey Complete Rifle/Pistol Cleaning Kits range in price from \$15.95 to \$17.95.

Both kits are a pretty good deal and I am glad to have them. I am partial to the Field Cleaning Kit - often I am at the range and would like to have a small cleaning kit, but do not want to drag out all of my gear from the garage and just end up doing without. Now I can always take along a kit whether I am going to the range or on a pig hunt and I don't have to worry about lugging along an extra, large case of equipment.

You can get more information on both kits and they can also be purchased at either -
